INDUSTRIAL SOLUTIONS

WE'RE OFFERING YOU SOMETHING PRICELESS – RELIABILITY.

Reduce Wear Rates Up To 40%

Are you constantly replacing grooved stainless-steel generator slip rings? These Mersen bronze slip rings feature structure and components improved for minimal resistivity, also reducing brush wear rates up to 40%.

Pug-And-Play Ability

Immediate installation with plug-and-play ability for all GE-Hitachi generators.

Extended Asset Life

3x the savings with a brush life of 3-5 years.

Prevent Turbine De-Rating

There is a temperature drop of 20-30% observed on slip ring, holders, and brushes. They protect NDE Bearings from temperature faults and protect WETA cards with robust grounding.

Resilient Construction

Built to withstand boosted operating conditions in all wind environments. Heavy-duty rods and lugs help secure rotor cables, while also improving brush life.

Improved Employee Safety

Keep your employees feet on the ground, fewer maintenance climbs with uniform brush and slip ring wear rates

APPROXIMATELY 3500 TURBINES EQUIPPED ACROSS THE COUNTRY WITH BRONZE RING
